PROFESSIONAL SUMMARY

MSc Artificial Intelligence student with professional web development experience and hands-on projects in NLP, computer vision and deep learning. Build Python applications with APIs and usable interfaces. Seeking an AI/ML internship or junior role contributing to applied AI and software development.

TECHNICAL SKILLS

AI and data: Python, PyTorch, scikit-learn, NLTK, OpenCV, YOLO, pandas, NumPy, TF-IDF

Development: Flask, Streamlit, REST APIs, SQL, JavaScript, HTML, CSS, Bootstrap, WordPress, Git

EXPERIENCE

Artificial Intelligence Intern | CodeAlpha | Remote | Aug 2026 - Present

- Developed four internship applications covering translation, FAQ retrieval, symbolic music generation, and object detection and tracking; program scheduled to end September 20, 2026.
- Built LinguaLeaf with translation provider integration, language detection, text-to-speech, caching, and API error handling in a Streamlit interface.

Junior Web Developer | W3Engineers Ltd | Dhaka | Apr 2025 - Sep 2025

- Developed responsive WordPress and static websites with HTML, CSS, JavaScript, Bootstrap and SCSS; translated Figma designs into reusable layouts with designers and backend developers.
- Improved website performance and cross-browser compatibility through code optimization and reusable components.

Software Engineer Intern | W3Engineers Ltd | Dhaka | May 2024 - Mar 2025

- Performed manual QA, reported migration issues, supported responsive frontend development, and contributed to a VisaAgent prototype during an internal AI hackathon.

SELECTED AI PROJECTS

Campus Compass | Python, Flask, NLTK, scikit-learn

- Implemented retrieval over 18 curated FAQs using text preprocessing, unigram/bigram TF-IDF and cosine similarity, with a low-similarity fallback and responsive chat interface.

FlowLens | Python, YOLO11, ByteTrack, OpenCV

- Integrated pretrained detection and persistent tracking with movement trails, directional crossing counts, class filtering, live FPS reporting and annotated MP4 export.

MuseForge | Python, PyTorch, music21, Streamlit

- Implemented MIDI tokenization, a two-layer LSTM training pipeline, seeded generation and MIDI/WAV export; distinguished rule-based preview output from trained-model inference.

EDUCATION AND RESEARCH

MSc Artificial Intelligence | Asia Pacific University | Dec 2025 - Dec 2026 expected

Ongoing thesis: ASR fairness evaluation for Southeast Asian English; planned LoRA accent adaptation.

BSc Computer Science and Engineering | BRAC University | Jan 2019 - Mar 2023

CGPA: 3.74/4.00 | Merit Scholarship, 2020-2022

- Undergraduate thesis: Banglish sentiment analysis with a hybrid CNN-GRU model; collected and preprocessed 10,000+ samples and analyzed and labeled 8,000+ samples.

Languages: English (professional proficiency), Bengali (native)
